in the Council Chamber? Mr. MACEWEN the election of his successor will have to be made by that body. The choice of candidates is limited. The man who would have been preferred is Mr. E. MACRINTOSH, the Chairman of the Chamber and the resident partner of the firm of BUTTERFIELD and SWIRE. Mr. Mackintosh, however, declines the honour, on the ground, we understand, that he has not sufficient time to satisfactorily discharge the duties of the position. Another gentleman whose name naturally sugposts itself is that of Mr. E. R. BELILIOS. Mr. Belilios has already sat in the Council on a previous occasion, and proved himself a very useful member. He has made the Colony his home, his interests are bound up in its welfare, and to the discussion of the various matters that come before the Council he would bring a large fund of intelligence. Mr. BELILIOS, however, does not on this occasion offer himself as a candidate. Neither does Mr. FRANCIS, Q.C., although the learned gentleman is believed to entertain some ambition for a seat in the Council. Possibly both he and Mr. Belilios are waiting for the election by the Justices of the Peace when Mr. CHATER goes home. Another name that has been mentioned is that of Mr. N. J. Ede, whose services on the Sanitary Board ought to

secure for him a large measure of support if he came forward. To the somewhat uninteresting and laborious work of the Sanitary Board Mr. EDE devotes the same close and conscientions attention of a disagreement with M. Bavier-Chanffour. that might be expected from anyone in relation to his private business, and he would prove equally useful in the Legislative Council. Mr. EDE, however, is not at men who are understood to be willing and able to serve, and on whose behalf their friends have begun to beat up their forces. These are Mr. H. L. DALRYMPLE and Mr. T. H. WHITEHEAD, the local manager of the names that would first suggest selves to impartial observers it must admitted that either gentleman is fairly the duties of the position. Mr. DALRYMPLE the following values:-Cotton yarn, No. is the Chairman of the Hongkong and our local joint stock enterprises. branch. The first part of this objection does not appear to have much weight. Mr. WHITEHEAD is, we believe, practically as much a fixture in Hongkong as most of the merchants. As to the question of home and colonial interests, the preference would usturally, other things being equal, be for a Convent. man whose head quarters were in the Colony, but at the same time it must be remembered that there is nothing necessarily antagonistic

between home and colonial interests, and that a bank manager will naturally be interested in the prosperity of the place where he is stationed, as on that must depend the properity of his branch. It must be confessed, however, that neither Mr. WHITEHEAD nor Mr. DALBYMPLE has given the public much opportunity of judging of what his views on public questions may be. Whether they are in favour of the establishment of a Municipal Council, of the extension of

the elective element in the Legislative Conneil, and so on, we do not know. Both gentlemen are of course personally known to every member of the very limited constituency at Niger, uniting the French possessions in the merich, of Munich, examined the material filling house dust box. I am perfectly sure that all [23] whose hands they seek election, and the contest, so far as can be judged, will turn access to Lake Chad. chiefly on the personal popularity of the two gentlemen. If an election is to be decided on this ground, however, it seems to us it might be well to consider whether it should not be put to the test by an appeal to a larger constituency. Nearly all the members of the Chamber of Commerce are also Justices of the Peace, and most of the unofficial Justices of the Peace are also mem- HONGKONG AND WHAMPOA DOOR bers of the Chamber of Commerce. THE BEHRING SEA FISHERY The official correspondence with reference the Behring Sea dispute has been laid before the House of Representatives at Washington. The correspondence between Blaine and the new British Minister began January 2nd this year, with a very long letter from the Secretary to Sir Julian Panncefote. The Secre tary opened with the acknowled ment of the recoint of the papers bearing on the seigures made by the Euch. He says: "In the opinion of the President the Canadian vessels arrested and detained in Behring Sea were engaged in pursuit in itself contra bonos mores, a pursuit which of necessity involves serious and permanent injury to the rights of the Government and the people of the United States. The British Foreign Office appears to be O singularly ignorant of diplomatic usage and propriety. In the Queen's Speech at the cammendement of the present session we were informed "the convention concluded with the Emperor of Germany with respect to the government of Samea" would be before Parliament Similarly, the Anglo-German Confirmation Bill is described as being "a bill for the purpose of removing doubts with respect to the validity of above the level of 1,700 fathoms beneath the sea an agreement between Her Majesty and the Emperor of Germany." Now, anyone familiar with the history of 1870 is well aware that there is no such person in existence as the Emperor of Germany The Emperor's proper title is German Emperor (Deutscher Kaiser), and not Emperor of Germany (Khiser von Deutschland); and no Tantalion Castle, the ancient home of the change whatever has been made in this respect Douglases and celebrated in song by Sir Walter since the revival of the German Empire twenty Scott has long been a ruin. to the present condition of North Sea fishing Some say that it is nothing like what it used to be and is going from bad to worse, although they admit that the fishermen do not suffer; since, if they catch less they get a better price for what they do catch. Soles, for instance, which once sold for 30s, or £2 s trank, now letch from £5 to £9. We are familiar in most quarters with talk about things not being what they used to be, and need not lay too much stress on it. The right of grumbling is conceded as a national privilege, and it must be admitted that all the men by no means share this gloomy view. Indeed, the more intelligent and thoughtful among them seem to think that occasionally scarcity of certain kinds of fish is in the nature of things and not a matter under our control at all. The habits of fish are little understood, and though such as herriogs, mackerel, and pilchards are known to be migratory. appearing and disappearing in large numbers, it is not so generally known that this is true also of the fiat fish. They will travel hundreds of miles, and semetimes entirely disappear. They move together and have their own favourite Mining-"u," and not without it, as the Americans write places of resort. For instance, there is a sort of sandy valley with a ridge on each side not many miles out of Ramsgate; the soles take the valley of the letter "u" indicates a French origin for on the there ground. Then they have different all these words. We should be glad to believe habits according to size. Fish of the same year, a rule. Words of Latin origin which have come to us through the Norman French, as most of those in question have, ought certainly to be small with the "u."
